EPA should not have to tell Weston to take lat/longs and put photos into [osc.net](#) if you are on a Removal project.

Please let me know if Steve or Joyel directed START to not follow our normal procedures. That would be the only way that not following our normal procedures is acceptable. The OSC can tell you to do something different but you can't just decide on your own. This is very frustrating.

I'm getting the Lat Longs now from a separate document and will load them ASAP.

This is useless without lat/longs. Why don't your field teams follow the data management plan?? Ugh!

What can we do to get this into [osc.net](#) and the viewer?

Dave and friends,

Elliott made this photolog from the events at Gold King Tuesday and Wednesday and asked me to send it to you and Steve Way (Steve's is in a separate e-mail). Note the dates and times in the lower right of most photos. It seems like there was a lot of quick thinking and effective response to events. Elliott's documentation is great – I'm impressed at his photos and also his dedication in putting all of this together after a long stressful day.

I guess there are videos also!
